

SOP | PuTTY

Step 1:

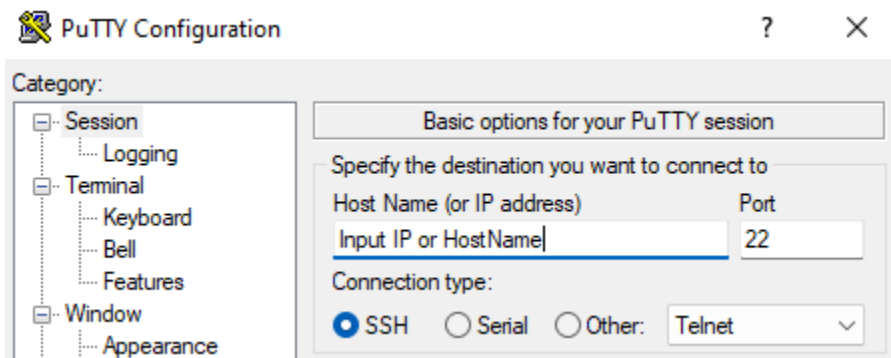

Once inside the Azure Virtual Desktop – Please navigate to the “Search bar” and type in “PuTTY”

Step 2:

Within PuTTY – Please input the following fields:

- Host Name (or IP Address)
- Port (22)
- Connection Type : SSH Telnet

Step 3:

Please click “**Open**” and you will now begin an SSH / PuTTY session towards the intended Linux Server
